**SQL** - **Structured Query Language** is a **programming language for storing and processing information in a relational database.** A relational database stores information in **tabular form, with rows and columns** representing different data attributes and the **various relationships** between the data values.

### Course Highlights

- ✓ **Best Teachers**
- ✓ **Individual Care**
- ✓ **Working on Live Project**
- ✓ **Syllabus completion on time.**
- ✓ **Real Work Experience**
- ✓ **Minimum Course Fee**
- ✓ **Free Study Material**

**Core PHP**- is the **foundation programming language** of all **PHP frameworks, including Laravel.** Web application development through Core PHP can enable **creating an exceptionally dynamic application** that can test the limits of **web development possibilities.**

**Advanced PHP**. Offers a wide range of advanced concepts that can be used to **create complex and powerful web applications.** By mastering these **concepts, developers can create applications that are efficient, scalable, and maintainable.**

## Free Demo Classes Available

**LeHub - I.T. Academy Solutions**

E-8, 1<sup>st</sup> Floor, Main Karawal Nagar Road, Tanki Wale School ke Samne, Dayalpur, Delhi - 110094.
